Guideposts Point to New Heights

2012 Columbus Survey Findings
The idea behind CF Insights is simple:
What if each community foundation could know what all community foundations collectively know?

Created by Community Foundations

CF Insights responds to a hunger for shared knowledge and greater impact among U.S. community foundations.

Community foundations grow stronger when their decisions are based on timely, accurate, and complete information. Through CF Insights, community foundations improve performance and sustainability – individually and collectively.

Propelled by FSG

As nonprofit consultants dedicated to social impact, FSG combines deep knowledge of the community foundation field with world-class research, strategy, and evaluation capabilities.

In partnership with the Community Foundations Leadership Team, FSG has been a driving force for CF Insights since its inception.

Acknowledgements

CF Insights would like to offer special thanks to The Columbus Foundation which conducted the hallmark community foundation survey on behalf of the field from 1988-2007. We are grateful for the opportunity to now manage this important work of collecting and reporting field-wide data.

We would also like to thank the Council on Foundations’ Community Foundations Leadership Team (CFLT) for providing funding to transition the Columbus Survey to CF Insights in 2009, building on the infrastructure The Columbus Foundation established. This funding helped incorporate the Columbus Survey data within CF Insights' online database, creating a longitudinal field-wide dataset of great breadth and depth that is easily accessed by community foundations. The CFLT’s support also helped to improve the quality and variety of reports available to the field.

In addition, a wide range of community foundations contributed data to this report. We would like to thank all Columbus Survey participants for your contributions. We especially thank CF Insights members and funders for their continued support, which makes possible the growth and development of CF Insights’ knowledge base.

Foreword

With this report, CF Insights’ aim is to share a snapshot of community foundation asset growth and activity during 2012. The findings are based on 276 community foundation responses to the Columbus Survey as of June 2013.

Participants interested in detailed 2012 results for their foundation can visit www.cfinsights.org to find a wider range of comparative and longitudinal reports. CF Insights members can compare their 2012 performance to peer benchmarks in over 80 online reports. Available metrics focus on asset development, grantmaking, investment performance, and sustainability.

And for those community foundations who have not yet contributed data, there is still time. We encourage you to share your 2012 results and use the resources at www.cfinsights.org to create custom reports that put your own foundation’s performance in context.

As more foundations contribute and 990s are completed, more comparative data will be available and CF Insights will continue to build on this snapshot with analyses based on the growing data set.

CF Insights Membership

If you find this report valuable, we hope you will join CF Insights’ membership and become part of a community that is improving access to performance data and sharing knowledge across the field. Annual membership contributions start at $200 and are based on asset size. Visit www.cfinsights.org to learn more.
Overview of 2012 Findings

The 2012 Columbus Survey results mark new heights in major benchmarks for the first time since 2007. Overall, community foundations experienced increases in assets, gifts, and grants and continue to increase investments in operating budgets to expand capacity in order to pursue their mission.

While the findings focus on the totals and averages for the field, we hope that the data provides context to assess opportunities and challenges facing individual community foundations today. What we have heard time and again, particularly post-2008, is that sustainability is an evergreen challenge – no matter how you are able to grow your assets and operating budget, there will always be an interest in stretching resources as far as they will go.

Given the on-going challenge of limited resources, growth is reason to celebrate. However, an individual community foundation’s goals and focus should be driven not by reaching a particular asset size, but by an intentional and strategic approach to developing priorities given your donor base, community needs, and organizational strengths. CF Insights will further examine these themes in a publication on the evolution of community foundation business models, to be released in September 2013.

Quick Takeaways from 2012 Data

- The community foundation field represents $58B in assets, $6.9M in gifts, and $4.5M in grants
- Between 2011 and 2012, average growth rates were:
  - Assets – 9%
  - Gifts – 15%
  - Grants – 6%
- Fiscal year end matters when comparing asset growth rates by community foundation
- 79% of community foundations have 2012 asset levels that exceed 2007 asset levels
- Donor advisors increased assets held in DAFs by 22% on average, representing faster growth than assets overall; these funds represent a significant amount of gift and grant activity at many community foundations
- Administrative fee revenue accounts for ~65% of total revenue and smaller community foundations typically have a more diversified revenue base
- Almost 3/4 of community foundations increased their operating budget in 2012
2012 Findings

The questions that Columbus Survey participants most frequently want to know are:

1. How did community foundations as a field grow in the last fiscal year?

2. How did my community foundation grow relative to peers?

Thanks to the 276 participants in the 2012 Columbus Survey, we are able to provide insight into both of these questions. Columbus Survey respondents represent over 90% of estimated total field assets and reflect the field’s diversity in assets, geographies, and strategies.

Examining the operating performance of these community foundations provides a perspective into the field’s performance and indicators to help you compare your community foundation’s performance.
Perspective #1: The Field Reached New Heights in 2012

By looking at the performance of the largest community foundations by asset size, we can consistently compare trends in the community foundation field over a longer time frame. In 2012, the largest 100 community foundations marked the largest total gains in assets, gifts, and grants since 2006. All metrics are at an all-time high.

Perspective #2: Individual Community Foundations Saw Varying Degrees of Growth

On average, community foundations of all sizes experienced increases in assets, gifts, and grants.

</tbody>
</table>
As in previous years, fiscal year end is a factor to consider when comparing asset growth rates. Market returns greatly impact the asset levels of community foundations and in 2012 the market closed lower in March and June than it closed later in the year. As a result, community foundations with FYEs in September and December experienced higher asset growth rates, unlike 2011 when a fiscal year end in March or June resulted in higher asset growth.

**Perspective #3: 2012 Was A Good Year, But Growth and Recovery Are Not A Given**

While the averages suggest growth across the board, 13% of Columbus Survey participants experienced a decrease in assets between 2011 and 2012. Typically these foundations have FYEs in March or June.

For an individual community foundation, full recovery following the market downturn in 2008 is not a given. Last year 63% of respondents had 2011 assets higher than 2007 levels. In 2012 almost 80% reached this bar. This leaves 20% that continue on a path to recovery as measured by asset levels. Region, FYE, and asset size do not appear to be factors that explain the differences. Success in generating new gifts does explain some of the difference. Those community foundations that have not
fully recovered saw gifts decline an average of 6% between 2007 and 2012. Those that have recovered have seen gifts grow by an average of 2% annually.

There is also variability in the trends for gifts and grants. While the averages show positive growth in both gifts and grants, 28% of respondents experienced moderate or dramatic decreases in gifts, while 19% decreased grants. In 2011 these numbers looked rather different, with 44% experiencing decreases in gifts and 26% decreasing grants.
Perspective #6: DAFs Rev Up the Engine for Growth

Donor Advised Funds (DAFs) grew in 2012 and accounted for significant activity in the community foundation field. Excluding supporting organizations, DAFs represent 69% of total gifts and 61% of total grants for the community foundation field. At a typical community foundation, DAF gifts and grants were just over 40% of both gifts and grants (excluding supporting organizations) – a trend that has been consistent over the last few years.

Community foundations continue to hold the majority of DAF assets at almost $17B. Total assets increased at a slightly higher rate at national providers than at community foundations between 2011 and 2012 (23% increase in assets at national providers vs. 18% increase at community foundations).

The larger growth in assets at national providers is driven by higher gift levels in 2012 and slightly lower grants paid out.

To understand more about the strategic opportunity of DAFs for community foundations beyond growth in assets, turn to CF Insights 2012 research Do More Than Grow: Realizing the Potential of Donor Advised Funds.
Perspective #4: Administrative Fees Still Drive Revenue, But There’s a Mix

In 2012 administrative fees accounted for over 60% of total revenue on average. However, virtually all community foundations have a diversified revenue base. This is particularly true for smaller community foundations which rely on a more diversified revenue base than mid and large-sized community foundations.

Perspective #5: Operating Budgets Have Grown As Community Foundations Increase Capacity

In each year since the beginning of the downturn, the majority of community foundations have increased their operating budgets, despite seeing assets and gifts contract. In 2012, 75% of respondents increased their operating budget by an average of 20%.

What accounts for increases in operating budgets? Costs associated with running a community foundation on a day-to-day basis have increased since 2008. But intentional decisions at the community foundation to increase organizational capacity through staffing or investment in leadership efforts may have had the biggest impact on the budget. Personnel costs typically account for 60-80% of total community foundation operating costs.
Perspective #7: Community Foundation Business Models Have Evolved Over the Last 10 Years

In the early 2000s, the discussion around community foundation business models centered on the misalignment between costs and revenues for each product offering. As a result, many community foundations focused on making investments intentional and aligning economics with mission. Ten years later, we see an improvement in the clarity with which community foundations allocate resources, and observe a more nuanced discussion about how to increase operating capacity and revenues to strengthen their strategic positioning. From the community foundations who have shared data with CF Insights, we have learned that:

- **Being disciplined works.** Business models have become stronger by adjusting the economics of individual offerings, and as things change there is always room for further adjustments.

- **Business models have flexed.** Community foundations are increasingly confident about a value proposition and identity tied to leadership roles. Adding roles has added complexity to the business model, and revenue sources have diversified and expanded alongside.

- **Adapting is the key to sustainability.** Community foundations will always be challenged to adapt the business models to serve what they see as part of their mission and changing roles.

- **Effective choices are aligned.** The biggest challenge for many community foundations is finding a way to integrate and balance strategic priorities and business model choices – aligning roles designed to serve different constituents.

CF Insights will release a publication looking at the evolution of community foundation business models in September 2013.

**Moving Forward**

Asset growth, grants, and especially gifts will vary by foundation and by year. This variation underscores the importance of understanding your community foundation’s performance not only as part of the overall trends, but also in the context of your peers. To engage in benchmarking, and make data-driven decisions about your goals for the future, visit cfinsights.org. Our goal is to support your community foundation along the path to greater sustainability and impact.
Appendix I – Next Steps

Compare Metrics for your own Community Foundation

We hope this field-wide analysis serves as a starting point for understanding your community foundation’s growth and grantmaking in the context of relevant comparisons.

CF Insights supports the field and our members in using data to uncover insights. Some action steps to consider:

• **SHARE** this report with your board, highlighting how your foundation compares to the field
• **CONNECT** with you peers to understand best practices and fresh ideas in the field
• **CREATE** benchmark reports at [www.cfinsights.org](http://www.cfinsights.org) to view metrics for your foundation’s performance over time or compared to a peer aggregate

Once you’ve logged in to [www.cfinsights.org](http://www.cfinsights.org), you can instantly generate comparative data to further understand your community foundation’s performance relative to peers. Longitudinal trend and high level comparative reports are available for the field and CF Insights members have access to reports with customized benchmarking data. Examples of these reports are listed below and more detail is available in Appendix IV.

*Based on 2011 Fiscal Year End Assets*
Appendix III - Methodology

This year’s Columbus Survey builds upon the work of The Columbus Foundation from 1988-2007. The Survey was transitioned to CF Insights for data collection via CF Insights’ online benchmarking database (www.cfinsights.org).

Field-wide survey participants entered their FYE 2012 data in the online form between April 2012 and June 2013. This process generated 276 responses, though not all data points were filled in – including assets, gifts, grants, fund-level data, total expenses and geographic information. Partial responses in some areas result in different sample sizes for various data points. For all data analysis, outliers of +/- 100% were removed from average calculations.

Longitudinal analyses only use data from foundations with complete data across the time period defined. Therefore, the sample size for these analyses is smaller than the complete 2012 data set.

The survey captures fiscal year end data, which results in some differences due to the timing of changes in the market or overall economy over 2011-2012. The time at which the data was recorded is of significance, especially for asset values, and in comparing an individual foundation to a peer cohort, we recommend taking fiscal year end into account when selecting peers.

Still Need to Participate?

CF Insights will be publishing future analyses on the 2012 data – make sure your foundation is included!

Visit www.cfinsights.org to enter your 2012 data or data from prior years. Click on the “Log-in” button in the upper right-hand corner of the homepage.

CF Insights members have data automatically submitted to the survey once their annual data entry is complete. You are able to submit “unaudited” data if your 990 or audit is not complete; CF Insights will ensure that your final 990 data will be automatically included once you submit your 990.

Non-members can email info@cfinsights.org to obtain log-in and password information.
Appendix IV – Peer Benchmarking Reports

As a part of our field-building mission, CF Insights has made benchmarking reports available to all Columbus Survey participants. Participants can log-in at www.cfinsights.org to generate dynamic online reports that show longitudinal and benchmark data to analyze your foundation’s historical performance and your performance compared to a selected peer aggregate and the entire field.

Available to All Community Foundations Participating in Columbus Survey

- **Longitudinal Reports for Your Foundation**
  - Annual Growth Rates of Assets, Gifts, and Grants
  - Average Fund Size
  - Assets Per Capita
  - Percent Assets Endowed vs. Nonendowed
  - Gift/Grant Ratio
  - Average Gift Size
  - Gifts per Capita
  - Annual Payout Rate
  - Average Grant Size
  - Grants Per Capita
  - Assets Per Audit Per FTE
  - Expense to Asset Ratio
  - Revenue to Asset Ratio
  - Operating Reserves
  - Operating Endowment

- **Benchmark Reports**
  - Total Asset Growth
  - Total Gift Growth
  - Total Grant Growth

Available to CF Insights Members

Additionally, CF Insights members can generate customized comparative reports based on Columbus Survey data as well as many other detailed metrics. CF Insights members can define who their peers are according to a variety of characteristics such as product focus, geography, asset size, or grantmaking levels. In addition to the non-member reports listed above, CF Insights members also have access to peer group reports:

**Assets**
- Assets by Product Among Peers
- Endowed vs. Nonendowed Assets Among Peers

The idea behind CF Insights is simple:
What if each community foundation could know what all community foundations collectively know?

Created by Community Foundations
CF Insights responds to a hunger for shared knowledge and greater impact among U.S. community foundations. Community foundations grow stronger when their decisions are based on timely, accurate, and complete information. Through CF Insights, community foundations improve performance and sustainability – individually and collectively.

Propelled by FSG
As nonprofit consultants dedicated to social impact, FSG combines deep knowledge of the community foundation field with world-class research, strategy, and evaluation capabilities.

In partnership with the Community Foundations Leadership Team, FSG has been a driving force for CF Insights since its inception.
